

Streetscape Construction Project Update

Ponce de Leon Ave/North Ave Intersection Improvements – We are thrilled that construction is underway for this exciting project that will transform the southern part of Midtown! This multi-phased effort includes intersection upgrades on North Avenue from the Connector to Piedmont, intersection and streetscape improvements along Ponce de Leon Avenue from Spring to Piedmont, and the revitalization of the Fox “triangle” park at Ponce/Peachtree.

PLEASE NOTE: Starting this week and for the next several months, the construction crew will be closing the curbside lane on northbound Peachtree Street between North Avenue and Ponce de Leon Avenue.

10th Street Streetscape – Construction has started on 10th Street between Williams and Juniper Streets! The project includes installation of new sidewalks, street trees, lighting, and handicap upgrades as well as removal of overhead utility lines and wood poles! Completion is anticipated this Fall, so stay tuned for lane closure and construction crew updates throughout the Spring and Summer.

West Peachtree Street, Phase II – New wider sidewalks, pedestrian lighting, street trees and handicap upgrades have been completed between 14th and Peachtree Streets. The removal of wooden utility poles and overhead lines is underway.

14th Street / Crescent Avenue – All pedestrian and traffic-calming improvements are complete! Georgia Power is currently relocating overhead utility lines and will be removing wooden utility poles soon on 14th Street between Juniper and Piedmont.

Peachtree St. Phase III – Although this project has been on hold for some time, we expect to start work in the coming months, which will include relocating Peachtree Street’s overhead utility lines underground between Peachtree Circle and the I-85 Bridge.
